

Bikendra Singh

Full Stack Engineer

8878685813 | bikendra7848@gmail.com

SUMMARY

Dedicated Software Developer with expertise in MERN Stack, Next.js, REST APIs, and database management. Experienced in developing real-time and scalable applications for international clients. Seeking a challenging role to deliver high-quality software solutions and support organizational success.

TECHNICAL SKILLS:

Front-End Development: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Tailwind CSS, Styled Components, React Hooks, Context API, Redux

Back-End Development: Node.js, Express.js, NestJS, Fastify, System Design, System Architecture

API Integration & Web Services: REST APIs, HTTP Methods, Status Codes, Websocket

Database: MongoDB, PostgreSQL, MS SQL, Redis

Security & Authentication: JWT, OAuth 2.0, Role-Based Access Control (RBAC)

Third-Party Integrations: Stripe Payment Gateway, Cloud Storage, Email/SMS Services, AI/Chatbot APIs, n8n workflows.

Version Control & Collaboration: Git, GitHub, GitLab

DevOps & Deployment: Docker, AWS, Google Cloud Platform (GCP), CI/CD Pipelines, Vercel, Netlify

Build Tools & Developer Tooling: VSCode, Cursor, Claude, npm, ESLint, Prettier, vim, nano

WORK EXPERIENCE

WebiWork Technologies | Software Engineer Dec 2023 – Present | Indore

- Developed and maintained scalable full-stack applications using Postgres/MongoDB, Express.js/NestJS, React.js, and Node.js, delivering high-performance features, reusable components, and secure RESTful APIs for enterprise-grade platforms.
- Designed and optimized backend services, database schemas, and API integrations while implementing authentication, authorization, caching, and performance tuning to support high-traffic and real-time applications.
- Collaborated closely with product managers, UI/UX teams, and stakeholders in Agile/Scrum environments to deliver scalable solutions, troubleshoot production issues, and ensure smooth deployment cycles using Git, Docker, and CI/CD pipelines.
- Integrated third-party APIs, cloud services, and AI-powered functionalities including chatbot workflows, recommendation systems, and analytics dashboards while ensuring code quality, security standards, and maintainable architecture practices.

PROJECTS

Project 1: CloudRent – Rental Management Platform

Project Description: CloudRent is a full-stack rental management platform that helps businesses manage item rentals, inventory tracking, warehouse operations, deliveries, collections, and reporting systems.

Role: Full Stack MERN Developer

Roles & Responsibilities:

- Developed frontend modules using React.js.
- Built backend APIs using Node.js and Fastify.
- Designed and implemented rental item tracking features.
- Developed inventory management across multiple warehouses.
- Implemented Sub-Rent functionality for third-party item rentals.
- Created delivery and collection management systems.
- Built damage reporting with image upload and cost calculation.
- Developed reporting dashboards with advanced filters.
- Managed database operations and API integrations.

Tools and Technologies: React.js, Node.js, Fastify, Postgres, REST APIs, GitHub

Project 2: StageMatch – Marketplace Platform

Role: Senior MERN Stack Developer

Project Description: StageMatch is an online marketplace platform where users can create product listings, buy/sell products, communicate through chat, and receive notifications.

Role: Full Stack Developer

Roles & Responsibilities:

- Developed frontend and backend using Next.js.
- Implemented user authentication and role management.
- Integrated Stripe payment gateway for secure transactions.
- Developed real-time chat and messaging systems.
- Implemented notification features for buyers and sellers.
- Created product request and approval workflows.
- Managed backend APIs and Stripe integration.

Technologies & Tools Used: Next.js, MongoDB, Stripe, Real-Time Chat, REST APIs, GitHub

Project 3: Little Big Shed – Community Resource Sharing Platform

Role: MERN Stack Developer

Project Description:

Developed and enhanced a community-driven resource sharing platform enabling users to list, discover, and exchange tools and resources through a scalable web application. Built responsive

frontend interfaces and robust backend services to support real-time interactions, secure transactions, and high-volume listing management. Improved platform scalability, API performance, and user experience through optimized React architecture and efficient Node.js services.

Roles & Responsibilities:

- Developed responsive and reusable UI components using React.js, Redux, JavaScript, HTML5, and CSS3, improving frontend performance and reducing page load/rendering time by approximately 30%.
- Designed and integrated scalable RESTful APIs using Node.js, Express.js, and MongoDB for listings, authentication, and transactional workflows, enhancing application responsiveness and supporting concurrent user operations.

Technologies & Tools Used:

React.js, Redux, JavaScript, Node.js, Express.js, MongoDB, HTML5, CSS3, REST APIs, JWT Authentication, Docker, AWS, Git, CI/CD Pipelines, Agile Methodology, Performance Optimization, Responsive Web Design.

Project 4: Suhavi Audio Books – Digital Audio Streaming Platform

Role: MERN Stack Developer

Project Description:

Developed and enhanced a digital audio streaming platform enabling users to access, stream, and manage audiobook content through a scalable and responsive web application. Built high-performance frontend modules and backend services to support seamless audio playback, real-time user interactions, and optimized media delivery workflows. Improved platform scalability, playback performance, and user engagement through efficient state management, API optimization, and cloud-based deployment strategies.

Roles & Responsibilities:

- Developed reusable and responsive UI components using React.js, Redux, JavaScript, HTML5, and CSS3, optimizing playback state management and improving UI responsiveness and rendering performance by approximately 30%.
- Designed and integrated scalable RESTful APIs using Node.js, Express.js, and MongoDB for streaming workflows, user authentication, and content management, reducing response latency and improving overall application efficiency.

Technologies & Tools Used:

React.js, Redux, JavaScript, Node.js, Express.js, Postgres, HTML5, CSS3, REST APIs, JWT Authentication, WebSockets, Docker, AWS, CI/CD Pipelines, Git, Agile Methodology, Performance Optimization, Responsive Web Design.

EDUCATION:

Rajiv Gandhi Proudlyogiki Vishwavidyalaya (RGPV), Bhopal MP.

Master of Computer Science – MCA, Jul 2019 - Aug 2021

Awadhesh Pratap Singh University (APSU), Rewa MP.

Bachelor of Computer Applications – BCA, Jul 2016 - Aug 2019
